

Ulrich Horse Barns, LLC

Delivering Quality Since 1972

ulrichhorsebarns.com • 877-854-BARN (2276)

About Us

Ulrich Horse Barns LLC was established in 1972 under the brand name Ring-O-Steel Barns. We were the innovators in panelized modular barns. Over the years, this evolved into offering a full line of galvanized steel barns, offering various styles and custom-designed buildings to customers throughout the southwest. A merger in 2018 led to a rebranding to our current name. In 2022, we relocated our manufacturing to Texas and began serving customers nationwide. As a factory-direct brand with over half a century of experience in agriculture and equestrian construction, we look forward to serving you and earning you as a raving fan of our people and products!

Willard Martin
UHB Brand President

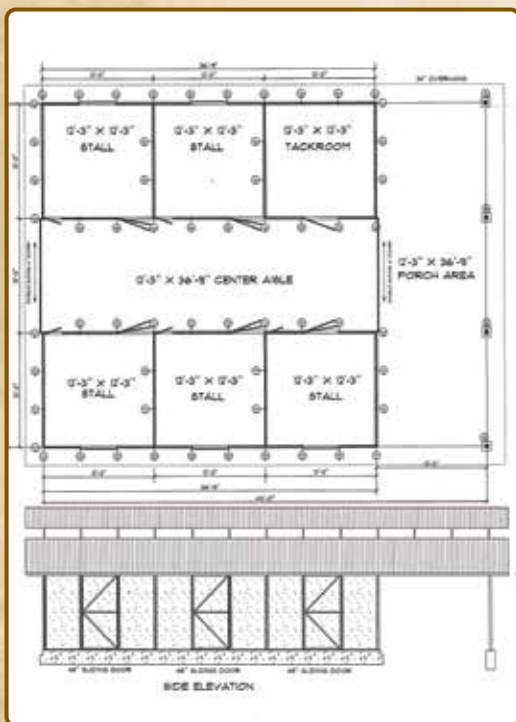

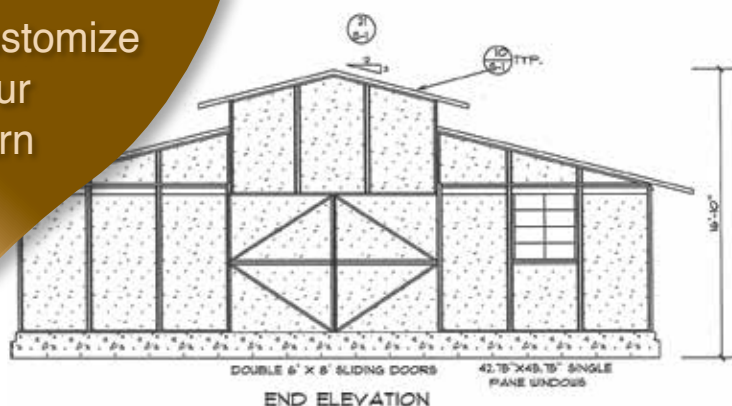

Crafted with pride right here in the USA. Building a horse barn is far more than merely filling a space with stalls; it's about creating a home for your horses that meets and surpasses your unique requirements. Call us for a design consultation or go to our website to use our online configurator.

Factory Direct - We Ship Nationwide

Customize Your Barn

All barns comply with the latest building codes and we can engineer for any needed wind load, snow load, or seismic zone.

We offer many styles and an almost endless list of options to choose from. With exterior and interior wall layouts including any combination of panels, windows, shutters, grills, porches, and many door options just to name a few. We can design a barn that fits your needs.

Want to go further? Add a Cupola, taller walls, a roof pitch up to 7: 12 or go with painted wall trim. Do you have other ideas? No problem we can further customize to create the barn of your dreams.

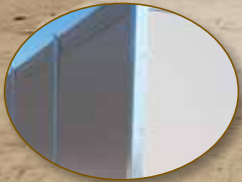

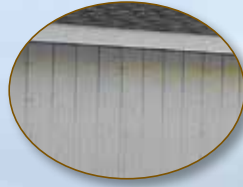

Our in-house architects can design your barn.

Board & Batten Siding: A completely
metal clad panel has all the beauty of
wood with the benefits of metal.

With our unique bolt together wall panel design,
each 4' wall section is interchangeable, this means
the advantage of future design flexibility.

Raised
Center Aisle
Barns

The Raised Center Aisle Barn is our most popular design. This horse barn comes with a 12' 3" wide up to 49' wide center aisle. Standard 12' 3" x 12' 3" or any custom size stall and 9' tall sliding doors on both ends of center aisle.

Whatever your need we can design any size building with up to a 48' clear span and 16' tall side walls. We build 3 sided structures as well as fully enclosed bird proof and insulated barns for all your storage needs.

Gable Barns

The Gable Horse Barn can be designed to any length and with a 12' 3" wide up to 49' wide center aisle or with no center aisle. Without the center aisle, the stalls are back to back for our most compact, low cost, fully enclosed horse shelter.

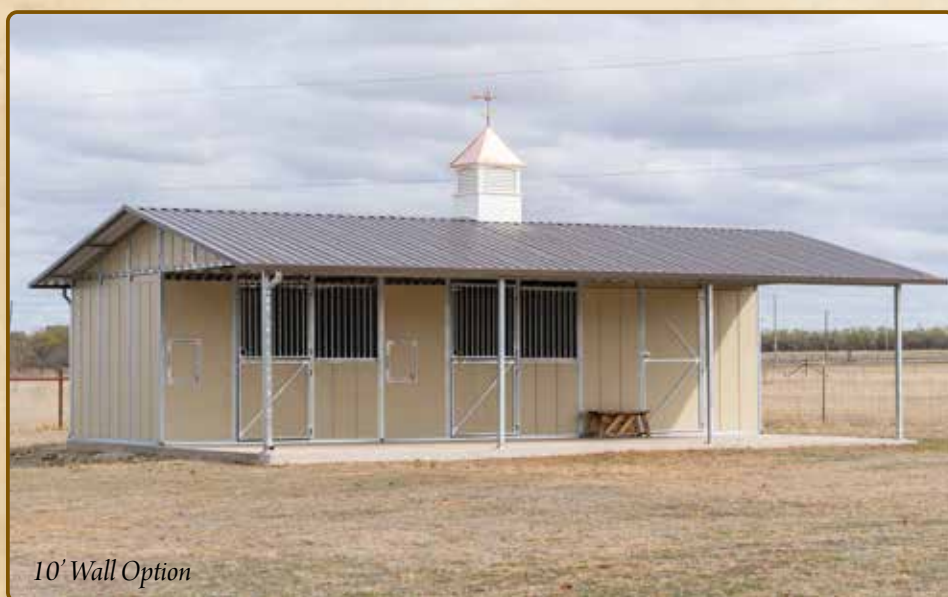

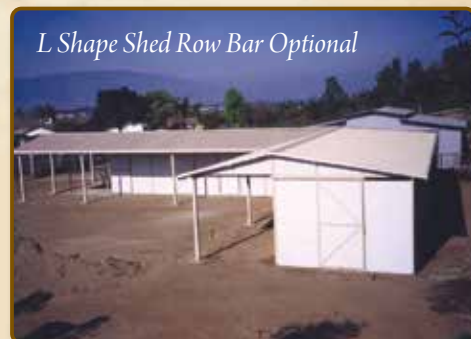

Shed Row Barns comes with a porch across the front. This building can be built in an "L" shape design giving you more boarding space in a smaller area.

L Shape Shed Row Bar Optional

10' Wall Option

Shed Row Barns

Shed Row Barns with the optional stall, tack / feed or rooms under the porch are most compact barn we offer.

Malibu Barns

The Malibu Barn can be built with full height solid wall panels or with only the lower 4' solid. The roof is a 1:24 pitch with a standard 24" overhang on the sides and the rear and a 48" overhang across the front.

Run In Sheds

These versatile Ulrich structures can be designed for whatever your need may be. An open hay or shade cover, a three sided open front storage building or Run In Shed or add the corral panel fronts to create stalls or even add a tackroom or office.

HD Round Pen Panels

These Heavy Duty Solid Round Pen Panels are available in an 8' tall solid panel or 6' tall with the lower 4' solid panel. They are built using the same wall panel as the Horse Barns with the same exterior color selection.
